DETAILED ACTION

1. Applicant's election of Species III with claims 1-3, 9-10, 14-16 and 23-25 indicated by Applicant to read thereon, in the reply filed on June 5, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4-8, 11-13, 17-22 and 26-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 4-8, 11-13, 17-22 and 26-31 are directed to Species non-elected without traverse. Accordingly, claims 4-8, 11-13, 17-22 and 26-31 have been cancelled.

Reasons For Allowance

4. Claims 1-3, 9-10, 14-16 and 23-25 are allowable over the prior art of record.
5. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor make obvious the claimed limitation of the instant application as a whole as

Art Unit: 2893

recited in claims 1 and 9, respectively. In particular, the prior art does not teach or suggest the particular subset of the process steps for forming a ceramic electronic device by providing at least one sintered body by firing the at least one insulating sheet having the at least one conductive layer formed thereon; detecting an amount of the metal contained in the at least one conductive layer of the at least one sintered body; selecting a sintered body from the at least one sintered body based on the detected amount of the metal; and forming an outer electrode on the selected sintered body as recited in claim 1 or by providing at least one sintered body by firing the at least one insulating sheet having the at least one conductive layer formed thereon; causing the at least one sintered body to vibrate near a coil; measuring a voltage induced on the coil; and selecting, based on the measured induced voltage, a sintered body from the at least one sintered body; and forming an outer electrode on the selected sintered body as recited in claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chen whose telephone number is (571)272-1689. The examiner can normally be reached on Monday-Friday (8:00am-4:30pm).
